

SUPER DUTY COMMERCIAL SERIES

**BLUE MARBLE WATER
SOLUTIONS**

Purity you can taste!

Converts Water Into Powerful Non-Toxic Oxidizing Cleaning Agents

Oxidize ItTM

Commercial Detergent-Less Laundry System

Never Use Detergent or Hot Water ... Again!

What is Oxidize It?

A Patented Oxidation System

Leaving Fabrics Cleaner and Fresher

OXIDIZE IT™, an American Product, is specifically designed to produce clean, soft, fresh-scented laundry without detergents, bleach, fabric softener, or hot water... all this while disinfecting your Fabrics. OXIDIZE IT™ activates by using a safe, electrical impulse that adds powerful activated oxygen and oxidizers to cold water, entirely eliminating the need for hot water. Have you ever left your laundry in the washer and then come back to a strange smell? That smell is detergent souring from bacteria growing in the fabric and in the gaskets of your washing machine. Now, you can eliminate that foul smell forever, without hazardous chemicals, using the OXIDIZE IT™ system! It does not require detergent, bleach or fabric softener; therefore your Fabrics will last longer, dry faster, and feel softer than ever.

OXIDIZE IT™ is a compact product, built for convenience without compromising quality, and hooks right to the cold water line without requiring any special tools in just minutes. Allergy sufferers no longer have to worry about reactions to detergents and chemicals. OXIDIZE IT™ is completely chemical-free and environmentally safe.

Benefits and Features

Health Benefits:

- The ozone created eliminates bacteria and viruses (strep, staph, and many more)
- Ozone kills micro-organisms in dirty laundry - 3000 times FASTER than bleach.
- Skin irritations and allergic reactions from soaps can be reduced or eliminated.

Eco-Friendliness:

- No Chemicals discharged into the environment
- Less plastic containers will clutter landfills

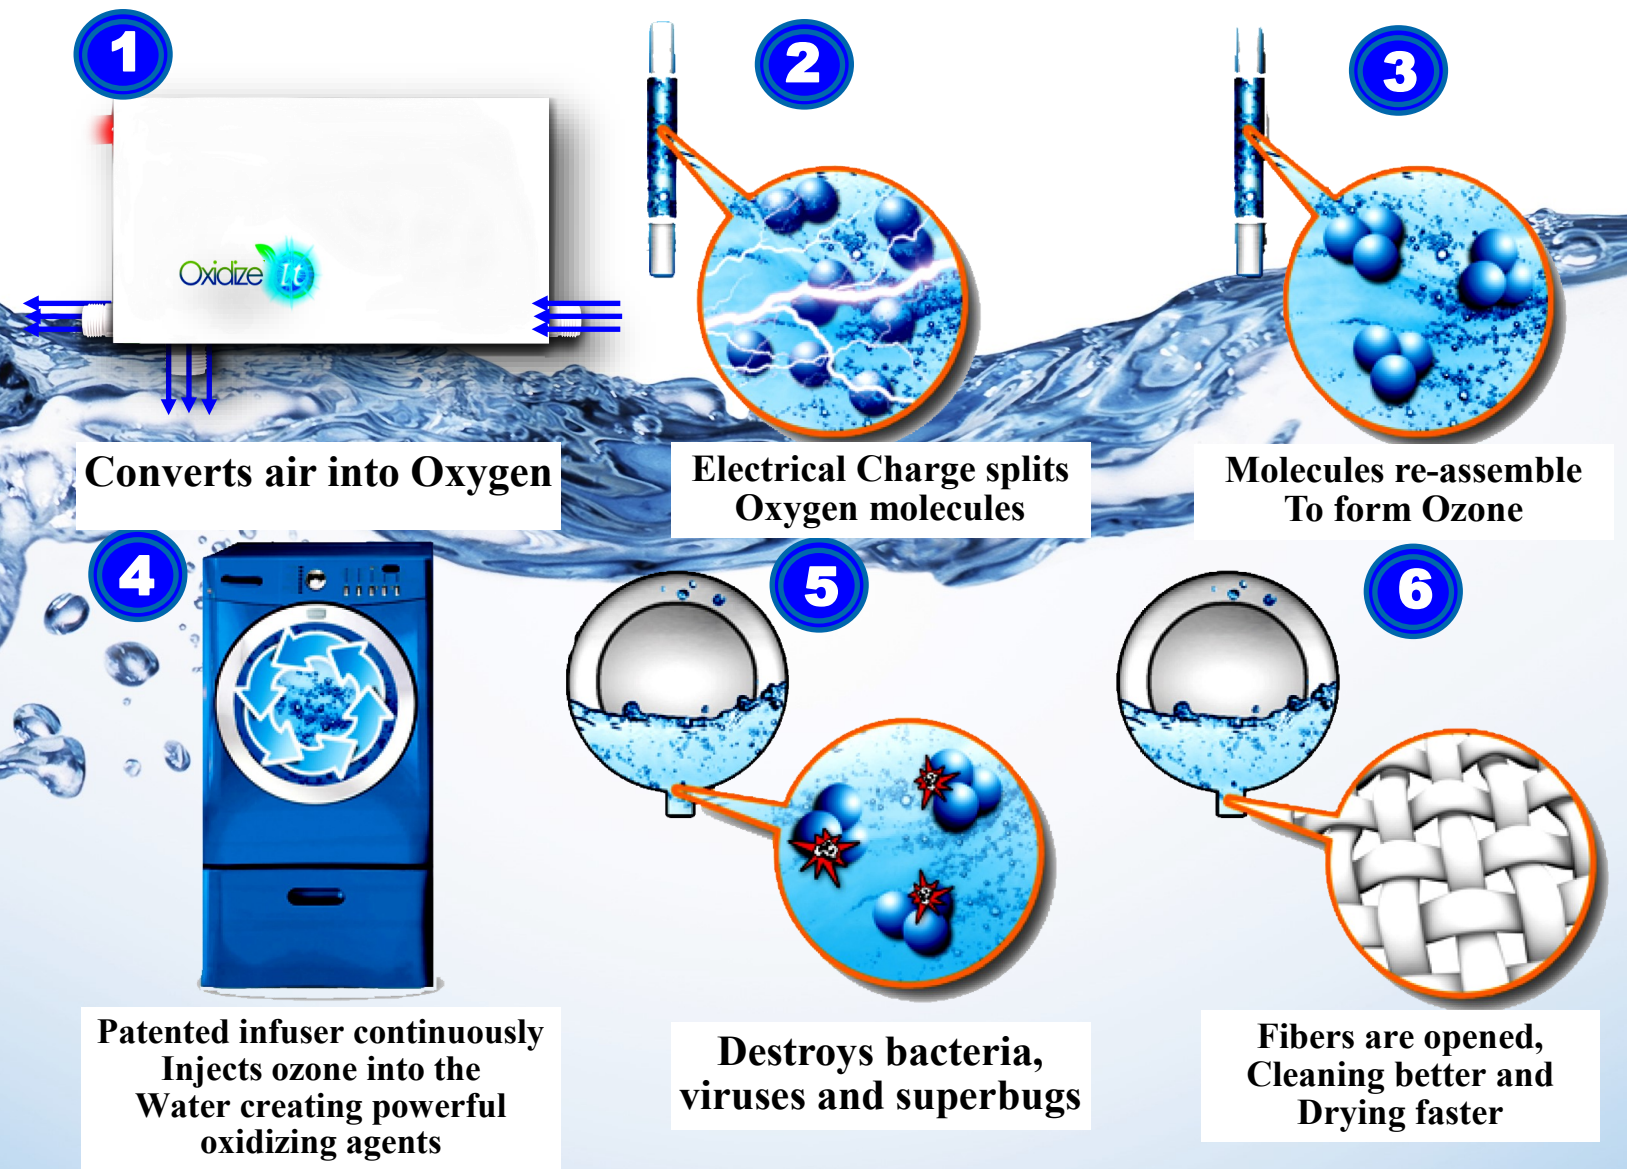

- Decreases clogging and increases decomposition in septic systems as detergent kills "good bacteria" that is needed.

Energy Savings:

- Consumes twenty-five watts of electricity (less than an average light bulb)
- No need for hot water - power used only when washing machine needs water
- Fabrics dry faster and are more fluffy when soaps are not left in fabric

How Does It Work?

Connects to ALL High flow, Low flow, and High Efficiency Washing Machines Cold Water Activated

The Science Behind Oxidize It®

Ozone does work for removing stains from laundry. It works through an oxidation mechanism whereby ozone and a hydroxyl radical, a breakdown product from ozone and water, can both work as oxidants. Ozone is a superb antimicrobial agent and can eliminate even superbugs when used properly.

The method for cleaning by ozone in water is based on two reaction mechanisms - a direct and an indirect mechanism. The direct method occurs when ozone acts as the oxidizer itself to open fabrics and to break chemical bonds. The indirect method involves ozone reacting first with water to produce hydroxyl radicals oxidizing chemical bonds. When ozone and hydroxyl radicals come in contact with soils and stains in linen, they help break chemical bonds to release the stain or soil. One kind of reaction (direct or indirect) will dominate.

Dr. Sheila Baker, Professor in the Department of Chemical Engineering at the University of Missouri Columbia scientifically examined the technology behind the Oxidize It™ Detergent-Less Laundry Solution.

EXTRA BENEFITS & SAVINGS

You Could Save Enough in the First Year to Pay for the Unit

SAVE UP TO

\$2,200

ANNUALLY
IN HEATING WATER

SAVE UP TO

\$466

ANNUALLY
ON LAUNDRY DETERGENT

SAVE UP TO

\$763

ANNUALLY
ON BLEACH

- No need to sort Fabrics by darks and lights, whites and colors, due to the elimination of hot water
- Fabrics will feel softer and more fluffy, since soap is not left behind on fabric
- Fabric life is extended
- Requires no detergent, bleach, or laundry softeners
- Installation is easy and takes minutes
- Rinse cycle works as a second wash cycle

- **OXIDIZE IT™ Detergent Less Laundry Solution** improves performance of washing machines
- Uses an advanced Oxidation System many hospitals and hotels have used for years
- Works on top-loaders, front-loaders, and high efficiency systems
- **OXIDIZE IT™** has an estimated life span of over a decade
- **1 YEAR LIMITED WARRANTY** with Lifetime Benefits

SAVE UP TO
\$3,429
PER YEAR
Total savings based on 10 Loads of Laundry Per Day using a Standard Washing Machine.
