

The Oxidize It system is an all-natural DETERGENT-LESS washing machine attachment that can connect to any washing machine by converting cold water into Oxidized Infused Water that washes clothes with only cold water and no detergents or softeners. The use of ozone has been adapted for use in the residential and small commercial laundry setting; the benefits of this natural cleaner is just now coming to light. The unique power of ozone (also called O3) as a natural cleaning agent is well known commercially. Hospitals and large hotels have used it for laundry with excellent results for decades, keeping linens clean and disinfected while prolonging the life of textiles.

What is Ozone and how it Cleans

This system works by breaking water molecules into its OH⁻ and H⁺ ions components. The OH⁻ acts as the cleaning agent by attracting and retaining stains while the H⁺ ions sterilizes the clothes. Ozone is created when electricity combines with oxygen to clean fabrics through a chemical reaction with insoluble soils. Oxidation occurs when ozone molecules come in contact with these oxidizable substances, including microorganisms such as viruses, molds, and bacteria. This reaction causes the soils to break into smaller molecules which are easily released from the fabric by the agitation of the washing machine. This process has been rated with a 99.999% "VALIDATED" kill rating on all superbugs, viruses & bacteria.

A client had a cat urinate on her clothes, she ran the clothes in her high efficiency express wash machine cycle. Here is her exact texted on the result: "Loving the unit Scott! It got the cat urine out in one wash! Actually, it was the express wash with extra rinse (28 minute cycle)! Smells amazing!!!!!"

This system converts regular cold water into an advanced Ozone Infused Water which many hospitals and hotels use to clean textiles for decades.

-  The O3 replaces detergent as a powerful OXIDATING magnet for cleaning and removal of foreign particles
-  Kills all germs & micro-organisms 3,000 times faster than bleach
-  Hypo Allergenic- NO MORE skin irritations & allergic reactions from toxic detergents & cleaning agents
-  O3 _OZONE- Bio Degradable
-  Can be used on all types of washing machines
-  No more sorting clothes by color
-  Extends fabric life
-  Clothes will feel softer and more fluffy
-  5 Year Warranty Residential but has a life cycle of 10 plus years
-  Install/Connect/Run: NO continual costly consumable parts or maintenance contract needed
-  Extends the life of the washing machine & sanitizes the washer on every use
-  Made in the USA with a strong guarantee

With one of nature's most powerful cleaners working for you, there's no need for expensive harsh detergents. It **does not use hot water, laundry detergent or laundry fabric softener**, which means an average family of four can be **ECO-FRIENDLY and save up to \$677 annually!**

- ❖ We have a 100% Satisfaction Guarantee Policy. We stand behind everything we sell.
- ❖ If you're not satisfied with your purchase, you can return it for a replacement or refund within 30 days.
- ❖ We highly recommend laundry hoses to be made with EPDM Rubber since Ozone can degenerate other rubbers and plastics over time. These can be purchased from Blue Marble Water Solutions
